# DOCTOR WHO

## GENESIS OF THE DALEKS

The Doctor's iconic enemies, the Daleks, have been inextricably linked to Doctor Who almost since its inception. After each story they were definitively killed and yet the metal monsters always found a way to return. Genesis of the Daleks was Terry Nation's third Dalek story in as many years and marked the peak of the mini-revival of Dalekmania. Having found himself challenged to write something new and more original than the Dalek stories of old Nation went back to basics. The Daleks were originally born out of his fears and memories of the Second World War as a child and Nation used the Nazis as a basis for the Daleks' fictional creation. With the character of Davros – superbly portrayed by Michael Wisher – as its crowning glory, Genesis of the Daleks must go down as one of the all time classics of Doctor Who.

## GENESIS OF THE DALEKS

### COMMENTARY BY

TOM BAKER, ELISABETH SLADEN, PETER MILES AND DAVID MALONEY

Tom Baker became the Fourth Doctor in 1974, and stayed in the role for a record-breaking seven years, during which time the series reached new levels of public popularity and cemented its place in the BBC's much-vaunted classic 1970s Saturday night schedule. After leaving *Doctor Who*, Baker appeared as Sherlock Holmes in *The Hound of the Baskervilles*, and featured in such productions as *The Life and Loves of a She-Devil*, *Medics*, *Randall & Hopkirk (Deceased)* and *Monarch of the Glen*. He was also the voice of Zeebad in the film version of *The Magic Roundabout*, and narrates the hit BBC comedy series *Little Britain*.

Elisabeth Sladen joined *Doctor Who* as journalist Sarah Jane Smith alongside Jon Pertwee's Doctor in the story *The Time Warrior* (1974), and remained in the series for the next three-and-a-half years. She has also appeared in *Some Mothers Do 'Ave 'Em*, *Z-Cars* and *Gulliver in Lilliput*. She returned to the role of Sarah for the *Doctor Who* spin-off pilot *K9 and Company* (1981), the show's 20th anniversary special, *The Five Doctors* (1983), and more recently alongside David Tennant's Tenth Doctor in the story *School Reunion* (2006).

Peter Miles appeared twice in *Doctor Who* alongside Jon Pertwee's Doctor – as Dr Lawrence in *Doctor Who and the Silurians* (1970), and Professor Whittaker in *Invasion of the Dinosaurs* (1974). His role as Nyder in *Genesis of the Daleks* was his last on-screen role in the series. He would go on to work again with Jon Pertwee, playing Tragan in the *Doctor Who* radio play *The Paradise of Death* (1993). His TV work includes *Blake's 7*, *Survivors*, *Z-Cars* and *The Sweeney*.

David Maloney's connection to *Doctor Who* goes back to the early William Hartnell episodes, on which he worked as a production assistant. Moving into directing, he returned to the program during Patrick Trroughton's era, with *The Mind Robber* (1968), *The Krotons* (1968) and *The War Games* (1969). He continued to direct for the series during the 1970s working on such stories as *Planet of the Daleks* (1973) and *The Deadly Assassin* (1976). *The Talons of Weng-Chiang* (1977) was the last *Doctor Who* story he directed before moving on to producing the first three seasons of the BBC's science fiction series *Blake's 7*.
